

AN INNOVATIVE SOLUTION THAT UNLOCKS ONESTREAM DATA WITH POWER BI

Black Diamond and Preferred Strategies have joined forces to create an innovative product called Power Analytics for OneStream. This turnkey solution harnesses the industry-leading capabilities of Microsoft Power BI to enable every business user to uncover valuable insights from OneStream data.

Power Analytics is a packaged solution in Power BI designed to seamlessly integrate with every standard OneStream application. It was specifically designed to be a plug-and-play solution with universal compatibility, requiring minimal customization. This makes it a ready-made visualization tool right out of the box that our customers can begin using in just 12 short weeks.

WHAT MAKES US DIFFERENT

-  Time to Value (12 weeks)
-  Real time Data & Dashboards
-  Interactive Reports
-  Custom Visualizations
-  Natural Language Query

HOW IT WORKS

We connect directly to OneStream and use data automation to keep Power BI in lock step with OneStream, thus creating a lights-out data refresh process in Power BI.

This includes security - we automatically take the entity security that you have in OneStream into Power BI and make sure that users only see the data for entities that they have access to in OneStream.

WHAT MAKES IT UNIQUE

- ✓ All of your Data in Power BI in USD and Local currencies
- ✓ All of your Dimensions in Power BI
- ✓ All of your Hierarchies and Alternate Hierarchies in Power BI
- ✓ All of your Entity Security in Power BI. Allowing you to manage security in one place
- ✓ Real Time Data: Use OneStream's data management tool to refresh Power BI with your OneStream data as often as you like.
- ✓ 500+ Out of the box KPI's
- ✓ 20 Out of the box ready to use Reports
