POWER ANALYTICS FOR ONESTREAM

Experience  OneStream™ data, anyway, anywhere

WHAT IS POWER ANALYTICS?

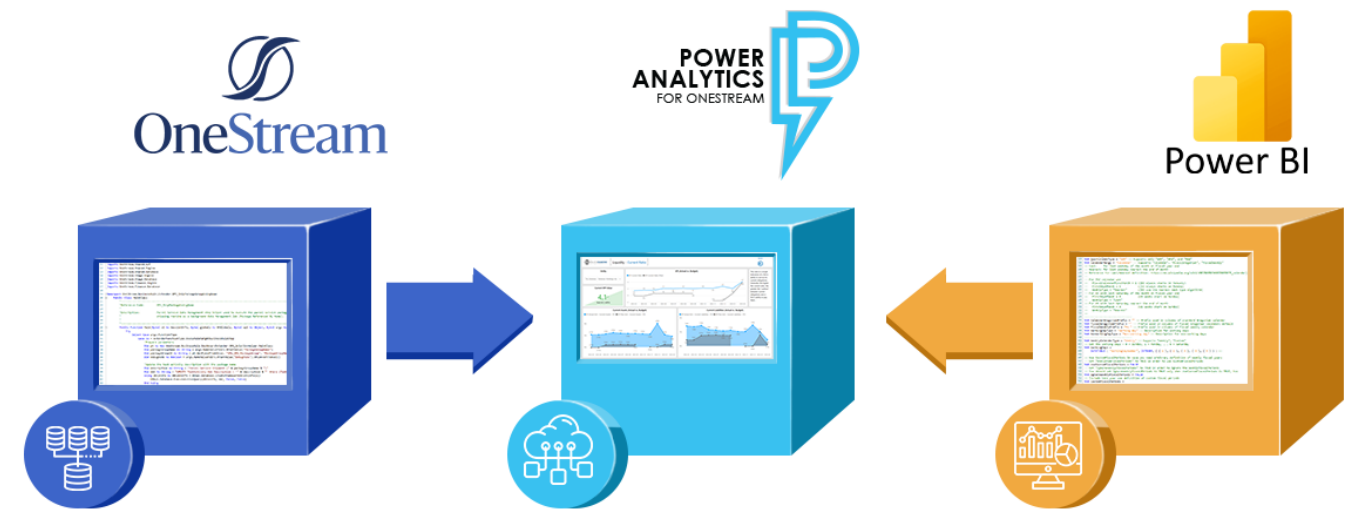

Power Analytics is a packaged solution in Power BI designed to seamlessly integrate with every standard OneStream application. It has been specifically created to be a plug-and-play solution with universal compatibility, requiring minimal customization. This makes it a ready-made visualization tool right out of the box that our customers can begin using in just **12 short weeks**.

Black Diamond and Preferred Strategies combined their software expertise to collaboratively develop an innovative solution, to uncover insights in OneStream data using the powerful visualization capabilities of Power BI.

HOW DOES POWER ANALYTICS WORK?

OneStream's API | BDA's Data Adapter | Power BI's SQL

Integrated Code: A portion of the magical programming is in OneStream and the remainder is in Power BI. Programming in both technologies is the secret sauce that makes Power Analytics unique and superior to any other product.

HOW DOES POWER ANALYTICS BENEFIT YOU?

Distribution: You can use Power BI to socialize your OneStream data across your organization.

Self-Serve: With the preconfigured Power BI model in Power Analytics, you now have a self-serve reporting tool for your OneStream data.

Made Easy: It's easier and faster to spin up your reports, graphs, and charts your way, in Power BI!

On the Go: Power BI is available on PC's, tablets, and mobile devices – allowing you to experience your OneStream data, any way, anywhere

Information at the Point of Decision: Business users access live CPM data, drill into the details, and then make decisions that drive strategic action.

WHAT MAKES POWER ANALYTICS SO POWERFUL?

Connect & Integrate: Connect directly to OneStream and use data automation to keep Power BI in lock step with OneStream, creating a lights-out data refresh process in Power BI.

- All of your Data in Power BI in USD and Local currencies. (You get to decide how much)
- All of your Dimensions in Power BI. (You get to chose which one's)
- All of your Hierarchies and Alternate Hierarchies in Power BI.

Security: Direct connect security from OneStream into Power BI to manage security in one place.

Key Performance Indicators: 20+ Out of the box Reports & 500+ KPI's & measures

Interactive Visuals: 40 Out of the box and ready to use reports and dashboards
