

# AN INNOVATIVE SOLUTION TO UNLOCK ONESTREAM DATA WITH POWER BI

*Packaged solution in Power BI , Integrates OneStream's Connector with our Plug & Play Solution, Ready to use in 12 short weeks*

Black Diamond and Preferred Strategies have collaborated to develop an innovative solution, Power Analytics, to uncover insights in OneStream data using the powerful visualization capabilities of Power BI.

## How Does It Work?

We connect directly to OneStream using OneStream's Power BI Connector. We also employ data automation to keep Power BI in lock step with OneStream, thus creating a lights-out data refresh process in Power BI. This includes security as well, we automatically take the entity security from OneStream into Power BI and ensure that users access aligns with their OneStream privileges.

## What Is It?

Power Analytics is an out-of-the-box solution designed to seamlessly integrate with the customer's V8.2+ SaaS OneStream application. It offers standard OOTB functionality and customization options to meet specific client requirements. Key features of our solution include. It offers the most standard OOTB functionality and customization options to meet their specific client requirements. Key features of our solution include:
