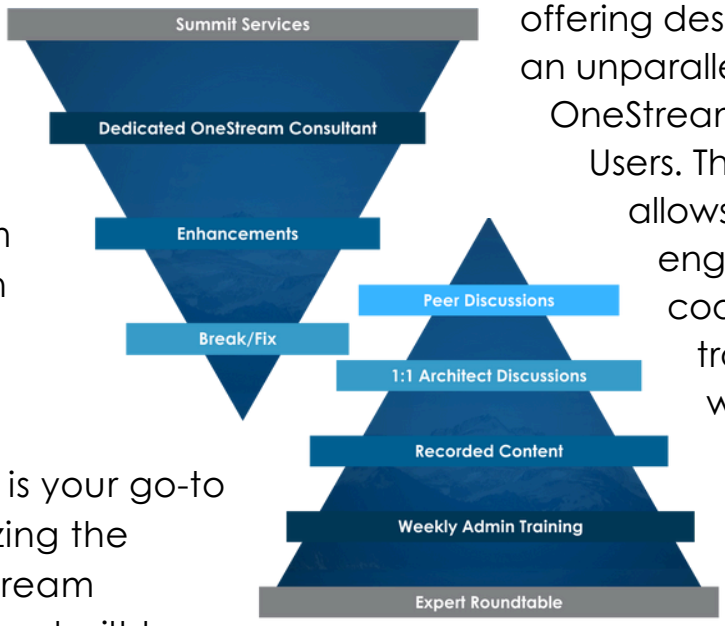
BLACKDIAMOND
ADVISORY

Two Pillars, One Powerful Partnership
Summit Services & Expert Roundtable

At Black Diamond Advisory, we are committed to ensuring that your organization achieves the highest possible value from your OneStream implementation. Our comprehensive support bundle, Summit Services and the Roundtable, are designed to work in tandem, offering expert assistance while fostering self-sustaining system administration within your team.



Summit Services

Our Summit Services is your go-to resource for maximizing the value of your OneStream platform. As a purpose-built team composed of platform experts with deep consultative experience, we focus on proactive continuous innovation and tactical platform guidance. We are here to fill any resource or skill gaps in your current team, while simultaneously training your administrators to eventually take over full support of your OneStream application.

Expert Roundtable

The Roundtable is a unique offering designed to provide an unparalleled experience for OneStream Admins and Super Users. This exclusive initiative allows participants to engage in personalized coaching and group training sessions on a weekly basis.

Together, Summit Services and the Roundtable provide a holistic support system, ensuring that your organization not only thrives today but is also equipped to manage and innovate independently in the future. Let Black Diamond Advisory be your partner in achieving sustained success with OneStream.
